"Debate, Discussion & Dissent are the tenets upon which the praxis of democracy rests" - DY Chandrachud (CJI)

Dissent is central to Parliamentary functioning

① Allows airing of grievances

② Prevents authoritarian tendencies

③ Channel for communicating alternative perspectives

Role of LoP in Indian Parliamentary system

① Statutory position (Draws salary and is of the rank of Cabinet minister)

② Equivalent to others in 'Order of Precedence' ⇒ highlighting the importance accorded

Significance of position

① Chief of the 'opposition ranks' →

VisionIAS

considered the 'voice of the alternative'

② Role in appointment of constitutional functionaries / statutory units (eg CBI chief, Lok Pal etc

③ Consulted before major policy shifts

(eg) LoP consulted during Sheikh Hasina's Bangladesh misadventure

④ Similar to British system of 'Shadow Cabinet' - considered the 'alternative PM'

⑤. Begins discussions on significant motions (eg ~~Malvankar rule~~ Adjournement motion

Areas of concern

① Narrow interpretation of Malvankar rule [10% strength of party] led to non recognition of LoP in 16th LS

The leader of Opposition is the guardian of India's right to disagree with government

2. न्यायिक प्रक्रियाओं में प्रौद्योगिकी का समावेशन न्याय प्रदायगी के संदर्भ में पहुंच, क्षमता और दक्षता को किस प्रकार बढ़ा सकता है? (उत्तर 150 शब्दों में दीजिए)

E-courts, Justice Chandrachud's brainchild has improved criminal jurisprudence, a marker of potential use of technology.

Integration of tech to enhance accessibility

① Reading judgements online
(eg) recent initiative available in Hindi, Tamil & Gujarati

② e-FIR - part of BNS, 2023 allows zero FIR [without consideration of jurisdiction of crime]

③ Simplified formats for appeal in higher courts

Technology and capability

① Machine Learning & AI to aid judges in delivery by referencing

previous case laws

(eg) SUVAAS

① AI to collate different cases under headers for dispatch at once.

Technology and efficiency

① Transmission of judgements to prisons etc for immediate delivery

(eg) SUPACE..

② e-streaming of court cases to enhance justice delivery & perception

However,

① Digital divide — rural-urban, rich-poor

② Poor pace of case dismissals (eg) SC has over 80,000 pendency prevents easy adoption

Given India's highly convoluted laws, simplification can be done through Generative AI, to benefit criminal jurisprudence

The Supreme Court of India has upheld unique asymmetry in India's federalism by intricately balancing centralized authority and regional autonomy. Discuss with the help of relevant case laws. (Answer in 150 words) 10

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

Asymmetric federalism has been a feature of polity with it being described as 'quasi federal' & federalism with unitary tilt (KC Wheare)

Balance between central & regional

① Where central preeminence needed SC evolved doctrine of 'federal supremacy'

eg Champakam Dorairajan case

② Where federal legislatures must be given due, SC evolved doctrines to ensure cooperative federalism

↳ Doctrine of Colorable legislation

↳ Doctrine of Basic structure itself (federalism part of Basic structure - Kesavanand Bharti case)

② Where fine balance struck

① In Bommai case, 1996, SC referred to the independent constitutional existence

⇒ 'States not constellations/ satellites of centre'

Therefore, dismissal of legitimate govt on flimsy grounds was struck as illegal

Grounds for unique asymmetry,

① Governor appointed by Centre (behaviour as agent of Centre (eg) SC in TN Gov withholding assent case)

② Emergency provisions converting federal to unitary

③ Financial power (Art 293) → impeding borrowing powers of State.

Therefore, SC has barked the unique asymmetric federal structure.

The NCSC is a constitutional body established under Art 338.

Effectiveness is circumspect where

① Tabling of reports: CAG flagged irregular tabling of reports [reduced frequency, photocopy of previous years]

② Affirmative proactive moves lacking

③ Divided along political lines (no objection to Govt run initiatives leading to misgivings, vocal against State in opposition)

④ Reactive rather than preventive measures

⑤ Frequent meetings not held, the NCSC board is decried as being full of political nominees in 'sinecures'

NCSC has been effective where

① Significant media attention drawn

(eg) Madhya Pradesh urinating on dalit incidents

② Presence of ongoing atrocities

(eg) Breach of anti-untouchability

③ Vocal support for reservation continuation across political parties

(eg) SC verdict on Creamy Layer for SC/STs

④ Routine inspections of state govt initiatives earmarked for SCs

(eg) Valmiki Corp Fund scam in Karnataka

Woodrow Wilson infamously remarked Parliament in Session is Parliament on exhibition, Committee in Session, is a committee at work

Why parliamentary accountability through Committees is successfull in India

① Financial committees work under expert guidance of CAG

② High level officers depose before Committees ⇒ greater accountability asserted at the very top

③ Presence of opposition and ruling party ⇒ critical examination of issues

④ Expertise laden : sometimes comprises of experts from outside

⑤ 'Behind closed doors' : No media glare

so petty party politics not seen

(eg) Standing Committee on Environment & forest under Chairmanship of Jairam Ramesh castigated the Nicobar Redevelopment Bill, since stalled.

(5) Bills needing further probing referred to committees (eg) Age of Consent Bill.

However, some features that do not inspire confidence

(1) Significant committees (eg) Defence etc are still party bound in discussions

(2) Secrecy in meetings; no transparency, public not informed

(3) Committees on Delegated legislation, Assurances on floor of parliament etc are defacto inactive

POCSO Act has been hailed for its ability to deter violence against the most vulnerable in society

Merits → ① Gender neutrality: victim can be male/female unlike IPC which is only female

② Special courts / speedy redressal of justice

③ High deterrence through large quantum of punishment:

④ Death penalty

④ Non cognisable and non bailable features

⑤ Recent amendments to increase the crime punishment

Existing inadequacies

① Potential for abuse

↳ ~~Child~~ Teenage consensual sex can be criminalised

② Parental control increases

↳ Belief that children do not have agency to consent to relationship with some age group

③ Deterrence value not high : continued cases

④ Legal application ~~mistakenly~~ mistaken "Skin to skin" judgement by Maharashtra HC

PRIs shaped by 73rd. constitutional amendment Act, and sharpened by PESA 1996 has begun to turn political.

PRIs as platform for competitive politics

① No original intent for political affiliation of members standing for office

eg Gram Sabha to elect Gram Panchayat not necessarily politically colored

However, with casteisation of politics, and clientelism in politics, political parties have entered panchayats

② Therefore hitherto apolitically envisaged instrument become battleground for political ideologies.

VisionIAS

Competitive politics generally lead to planning & service delivery because:

① promises made during campaigns

② doles while in office

③ attempts to overshoot the opponents assurances

Yet, they've not emerged as agency of planning and service delivery because

① Division of village polity (B.R Ambedkar's prophetic words of villages being sink of localism & den of politics is realised)

② Clear cut divisions along caste / creed lines ⇒ voting your caste is assured so promise of services delivery is not necessary

③ Patriarchal structures preventing functioning of PRIs as a functional unit (eg) Panchpati system

Specifically, failure of PRIs as a planning agency is due to

How is the rapid growth of the food processing industry leading to food safety challenges in India? (Answer in 150 words) 10

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

Food processing industry is a sunrise industry with CAGR of 8-10.5% by 2025

Rapid growth of food processing industry

① MSME like growth in food industry
↳ village cooperatives led growth

② FPO led food processing industry
(eg) MHIB in Maharashtra for grape clusters

③ Factors promoting rapid growth
① PMFME formalisation of food processing sector
② easy credit access
③ better market linkages

Food safety challenges

① Outside regulatory purview
↳ (eg) FSSAI does not regulate smaller units

उम्मीदवारों को इस क्षेत्र में नहीं लिखना चाहिए
Candidates must not write on this margin

② Easy scope for adulteration

(eg) Milk → Ghee

urea as adulterant

③ Quality checks lacking

(eg) Popped's grown by informal sector do not undergo quality checks

④ No accreditation entity such as QCI to regulate growth

⑤ Non declaration of raw materials used on labels

↳ no information on nutrient quantity ie, caloric input etc

(eg) Jam constituents made of palmolein oil

This leads to challenges in consumer safety with respect to asserting responsible choice & informed choice. FSSAI may be required to improve quality checks to ensure health consu

2. भारत की सार्वजनिक वितरण प्रणाली के अन्तर्गत उचित मूल्य की दुकान (FPS) का प्रारंभ एक विकासशील प्रक्रिया है। विवेचना कीजिए। (उत्तर 150 शब्दों में दीजिए)
Under the Public Distribution System of India, the Fair Price Shop (FPS) transformation is an evolving process. Discuss. (Answer in 150 words) 10

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

The Transformed PDS system through FPS directly connects beneficiary with food grains, behaving as first line of contact under NFSA, 2013

FPS transformation is evolving

① Initially doled out only food grains for certain sections (upto 1995) → BPL, APL

② Later began identifying poorest of poor for extra rations AAY (Antyodaya Anna yojana) upto 35kg/family

③ Under NFSA, 2013 transformed into rights based measure

FPS operates as
- → first line of contact
- → provisioning of food grains from central quota
- → provisioning from state quota (or) kerosene

VISION IAS

Newer paradigmatic changes

① e PoS : e-point of sale machines for better identification of beneficiaries

② ONORC : One Nation one ration card for integrated management of PDS. (migrants)

③ Aadhar seeding : To prevent inclusion/exclusion errors

Thus transformation helps avoid,

① leakages (eg black marketing, redirected sales

② better record keeping

③ align with Financial Management System

Changes still desirable, are:

① technology patches to ensure deserving not left out

② better surveillance to prevent quid pro quo at dispatch centres

Govt may adopt DBT to curtail ills of FPS.

Agri technology as the new buzz word seeks to tap into the nearly 50 $ Billion untapped market (Nomura)

Agritech startups help increase productivity

① Yield management : technology integration

eg using sensors → remote / → proximate to automatically reduce distribution

② Optimal usage of fertilizers / pesticide inputs

eg drones to spray potash solution not upsetting N:P:K of 4:2:1

③ Seed telling machinery for greater success. eg Happy seeder technology

④ Reducing farm residue

eg Pusa-186 solution by ICAR & PJ university

⑤ Satellite based advisory services for telling and cropping at right time

10

VISION IAS

Startups & market access

① Ensures access to foreign market

(eg) Rythu Mitra in K'taka teaming with KOPCOMS to export to untapped markets like Norway/Sweden

② Enhances price discovery → farmers getting right price by integrating across domestic markets

③ Reduces information asymmetry → enabling better price demand

④ Verifying contracts with middlemen for exploiting condition (eg) e-Nipay portal

⑤ Developing tools for grading and sizing so market dispatch can happen from farmgate to retail

(eg) Apple's 'measure' app.

While agripreneurs improve the market by solving niche issues, govt must protect farmers from predatory nature of capitalist enterprise

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

The land reforms which can be traced to [Kumarappa committee] in 1951 continue to happen given [scarce nature] of land in India; (< 2.3% of land supporting 18% population)

① Clarifying possession on land records

eg Rights of Records in PM SWAMITVA scheme

② Ensuring correct drawing of boundaries

eg cadastral mapping using GIS

↳ this ensures better access to land

③ Reducing legal backlogs

eg upto 40% cases in courts are land related and average 20 years for resolution : World Bank

④ Tapping into economic potential of land

VISION IAS

(5) Increasing investments into land

(eg) through creation of land banks

(6) Improving record keeping for easier access to govt to compensate farmers post land acquisition

[Eminent Domain]

Govt's agenda in this direction

(1) DILRMP: Digital India Rural Land Modernisation Programme under Ministry of Panchayati Raj & Rural Development

(2) ULPIN generation: Unique Land Parcel Identification number

↳ bhu-aadhar : 14 digits

Best case study: Karnataka's e-bhoomi portal for land digitisation allows quicker resolution

To fully exploit its demographic dividend and accelerate economic growth, India needs to adopt a manufacturing-led growth model. Discuss. (Answer in 150 words) 10

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

India's population [largest in 2024 as per UN Population Fund] will retain highest young population till 2044 [World Bank], while India's economy is projected to grow upto 7.5% (Economic Survey 2024)

Why there's a need to adopt manufacturing led growth

① Agriculture becomes non remunerative
→ already disguised unemployment
PLFS says ~47% employed for 17% GVA

② Services sector is jobless growth
~56% GDP employing less than 33%.

③ manufacturing creates jobs
eg Textile industry employing ~4.5 crore and 8 crore across value chain.

Piggybacking on economic growth:

This can be achieved through,

① Increased investments in manufacturing

(eg) PLI scheme,

② Enhanced start up culture & entrepreneurship model

(eg) Stand up India, Start up India

③ Select sectors focussed on for strategic purposes

(eg) Solar energy sector, electronics & chip manufacturing

India's growth trajectory to remain strong must be job led to prevent youth discontent leading upto fracas like Bangladesh crises. However, economists such as [Raghuram Rajan] warn that India cannot compete with China in manufacturing sector due to early mover advantage it produces

① Odisha like approach

Zero mortality by increasing the preparedness levels

② People centric approach

mock Drills & adequate warnings to simulate conditions

↳ drawing up of mitigation & disaster preparedness plans at Panchayat level

↳ first responder approach

In the era of climate change and growing water scarcity, how can micro-irrigation systems contribute to sustainable agricultural practices in India? (Answer in 250 words) 15

उम्मीदवारों को इस क्षेत्र में नहीं लिखना चाहिए
Candidates must not write on this margin

Micro irrigation systems are the one stop solution to all issues water adequacy related in farming

Era of climate change and water scarcity

① Climate change → increased erraticity of monsoons eg Delhi received highest rainfall in August (wrt to last 20 yrs) whereas Maharashtra faces drought

② Water Scarcity due to increased heat waves increasing → evaporation from soil
→ transpiration from plant

⇒ increased agricultural drought

③ Increased water extraction [263/750 already critical as per CGWB] further decreases water drawing capacity

∴ metrological drought & agricultural drought is accentuated by climate change

Micro irrigation & sustainable climate change practises

① e-agriculture : judicious use of resource
⇓
only required amount is delivered with technology integration

② Through micro sprinklers etc
↳ continuous supply of water ⇒ reduces water stress in plants

③ Through drip irrigation :
retains soil moisture ; prevents dessicatory effects

(6) Customs delays at docking stations

(7) Preference to road transport to evade taxation

(8) Derailing of trains (eg) recent West Bengal derailing incident

(9) Theft / lack of security on freight railways

Strategies adopted by GoI

(1) Increasing number of railway lines

(2) Freight dedicated corridors (DFCs)
(eg) Eastern Freight Corridor by World Bank
Western Freight Corridor by JICA

(3) Multimodal transport: with integration for smooth passageway

Factors aiding India in making strides

① Technology improvements

↳ Solar panel technology has improved along with IP of underlying technology becomes available

② Compelling international need:

↳ Under "Panchamrut commitments" to transition to zero carbon by 2070
50% green renewable energy by 2030
500GW non fossil fuel energy by 2030

③ Prevailing domestic demand

↳ Enlightened citizenry, creating

awareness about transition to climate positive status

(4) Coercive foreign trade regulations

(eg) EU's 'CBAM' requiring carbon markets to be well established

⇒ reducing carbon footprint in products of usage

(5) Supporting governmental policy

(eg) PLI scheme on solar panels

(6) Increasing investment in green agenda

(7) Public private partnerships : Convergence with NGOs (eg) NEERI CSIR patent on organic carbon film strips

(8) Geoclimatic availability

→ Tropical region : solar

→ long coastline : wind
: tidal energy

→ gobar present : biomass

Where India is a frontrunner

① 50GW of solar energy in last 3 years
(eg) Pavagada Solar park

② Diversification of renewable energy
(eg) → Green hydrogen energy
→ Green ammonia
and CBG using PM-GOBAR etc

③ Quick adaptation (eg) e-vehicles in public sector.

However, India still lags behind China which added more solar energy potential in 1 year than total combined potential available, highlighting need for, consistent push towards "Lift Mission" to reduce consumption and "recycling" focus to improve sustainability

How does agricultural runoff containing fertilizers and pesticides contribute to environmental pollution? What measures can be taken to mitigate the impact of agricultural runoff? (Answer in 250 words) 15

उम्मीदवारों को इस क्षेत्र में नहीं लिखना चाहिए
Candidates must not write on this margin

Agriculture fertilizers in India primarily comprise urea (NPK) and nitrate of potash which are highly environmentally polluting.

Agri runoff contribute to environmental pollution

① Soil pollution:

↳ Derangement of soil fertility values from 4:2:1 to 7:3:1

↳ Remodelling gradation / texture from fine soil to coarse soil (seen with excessive application on alluvium)

② Water pollution:

↳ Ground water pollution through infiltration / leaching → leading to NO_2 / NO_3 (Nitrate poisoning)

VisionIAS

NO_2^- poisoning may lead to blue baby syndrome

↳ Surface water pollution : Eutrophication leading to fish kill due to anoxia due to overgrowth of algae/fungi due to nutrient enrichment

③ Air pollution :

↳ Excessive application of Nitric/sulphuric fertilisers leads to enhanced air pollution (increasing NO_2) (SO_2)

acid rain possibility

④ Biodiversity threat ;

→ Affects local fauna (eg) earthworms

→ allows proliferation of non native species (eg) Acanthia

Measures to mitigate runoff

① Control overall urea wastage :

by reducing easy availability

(2) Frequent soil checks (eg) Soil Health Card Scheme, once every 4 years detecting for 9+3 micronutrients & other factors

(3) Technological use

→ drip irrigation admixed with fertilizers prevents air pollution

→ drones for spraying nutrients

→ mechanisation for higher efficiency

(4) Check bunds against water bodies to prevent run off into them

(6) Foliar application (neem coated urea/ nano urea/ sulphur urea)

(5) Movement towards organic practice

With the Joshimath tragedy and frequent landslides in Himachal Pradesh, there's a need felt for greater focus on carrying capacity

Growing influx breaching capacity → disasters

① High tourist footfall eg Shimla/Mandi
→ Construction activities expanding onto riverfront ⇒ river waters wash away during swell flow

② Increased demand on water/ resources
↳ extraction from groundwater
⇒ subsidence eg Joshimath

③ Higher construction activities near roads
↳ deforestation → landslides

(4) Disturbing pristine ecology through rock climbing/trekking etc ⇒ rock fall (Dehradun)

Measures to be implemented to prevent such disasters

(1) Limiting tourism in off season

→ allowing local ecology to rejuvenate

(2) Restricting total number of tourists in one place

(eg) Venice, Italy does not take more than carrying capacity

(3) Strict control over construction activities:

(eg) Private construction to be assented by local municipal authority

(4) Watch over cropping of homestays etc

IP Rights rule the quiverry sector of market, generating significant income to its holders

India has laws covering types of IPR

① Patent Act : (1947) for patents in industrial products of utility

② Copyright laws : for rights over artistic works granting 20 years rights for musicians, lifetime for authors/publishers

③ Geographic Indications Act (1999) : Giving location specific rights to products.

④ Trademark : Over specific brands & names eg Nike "Just do it"

Challenges hampering commercialisation

(A) Enforcement :

↳ frequent breaks / violations of patent protections

(eg) selling Puma as Pumba.

⇒ faith in IPR lost

↳ No novelty in products

⇒ reverse engineered products.

↳ Difficulty in enforcement due to limited action by police

(eg) fake Raymond Tshirts / Tag Heuer watches

(B) Regulatory :

↳ 'evergreening practise' of foreign patents with slight modifications

↳ multiple levels of authorisation while claiming IP Rights

↳ compliance costs high

↳ Delay in granting IPR

↳ Filing of IPR on digital portal faced with issues.

(c) Administrative challenges :

↳ Multiple relaxations which are legal

(eg) Delhi Uni Xerox case ⇒ allowing break of copyright for personal use

↳ Compulsory Patenting provision makes people wary of registering patent in India.

Despite low GERD (~2%), compared to Japan at 5% and USA at 15%, India produces many research articles every year but final quality challenges prevent actual conversion to commercial feasibility.

India must invest in GERD while enhancing regulatory potential in order to grow IPR in India
